Evening Brief

Date: August 16th, 2021

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

| | | |
|-------------|------|--|
| Great Basin | PL 3 | Light Initial Attack Activity |
| National | PL 5 | New Fires and Acres: 13 fires for 30.11 acres / 530acres Large Fire Growth |

Weather:

A low-pressure system drops into the Pacific Northwest on Tuesday, bringing increasing winds of 30-45 mph to much of the western Great Basin, with the best combination of strong winds, low humidity, and dry fuels, across the northern half of Nevada, into far northwest Utah where **"High Risk"** triggers have been issued. The increased southerly flow ahead of the front further south and east, will also push monsoonal moisture into Utah for increasing chances of showers and thunderstorms across much of Utah late Tuesday, spreading further northward into eastern Idaho and western Wyoming on Wednesday. The low tracks across the central Idaho mountains on Wednesday bringing a strong 15-20 degree cool down for much of the region by Wednesday/Thursday.

A drier weather pattern returns to the Great Basin by the end of the work week.

However, another cold front will push into the northern half of the Great Basin by the weekend, with continued cooling and scattered showers for Idaho, Wyoming and northern Utah.

Fuels/Fire Potential:

Fire Danger has steadily increased with the recent hot temperatures and dry conditions across most areas. Fuels are driest across Western Nevada and far western Idaho, near or above the 90th percentile in most areas there. Further north across Idaho and Wyoming fuels are mainly in the 70th - 90th percentiles but drying rapidly with the hot and dry conditions. Isolated thunderstorms the next few days in northern areas could trigger new ignitions with rapid growth.

By midweek, rapid moistening of fuels are expected across the Northern and Eastern portions of the Great Basin with a change to sharply cooler and more moist conditions. The only critically dry fuel areas by the end of the week will be across Western Nevada.
